

UNITIVE AGE COLAB

CO-CREATING A FLOURISHING FUTURE

Principles of Engagement

These are the ways that we seek to engage with others

Deep Listening - Humility - Peace – Compassion

See the the best in everyone

as we have all been surviving within our own contexts and worldviews

Be aware of the limitations of your own worldview lens

and that others will have developed different perspectives

Understand the impact of language

on how we view and experience the world

Avoid blame or judgement

*as most people have been trying to do the right thing
given their own systems of knowledge and understanding*

Look for the opportunities in every situation

as they are always there

Include people you don't agree with

as the edges are where the treasure is

Make sure everyone can contribute

as there is power in the collective

Remain kind, humble and compassionate

recognising that there are many versions of the truth/reality
